General Information

Short summary

A Belgian company active in solar steel structures assembly is looking for a European manufacturer of galvanized foundation screws.

Full description

With more than 15 years of experience in the photovoltaic industry, the Belgian company specialized in ground mounting systems and photovoltaic shade; designs, produces and installs its own systems. In this way, the company can guarantee perfect control of the products.

The company continually invests in its personnel and infrastructure to maintain and improve its level of quality.

To ensure the anchoring of its structures, the company needs foundation screws.

The Belgian company currently purchases its foundation screws in Asia and would like to find geographically closer suppliers, preferably SMEs, in order to secure its supply chain.

Advantages and innovations

The Belgian company is working in a sector with high growth potential and is attentive to the quality and durability of its structures.
The anchoring system using foundation screws avoids the installation of concrete structures and thus contributes to the sustainable development objectives of the company.

Technical specification or expertise sought

The foundation screws must be produced with a diameter of 76mm, a thickness of 3.5mm and in two different lengths: 1400mm and 2100mm.
The screw material is S350 + Galvanization (C3 corrosion class) - See drawing attached

Stage of development

Already on the market

Sustainable Development goals

- **Goal 7: Affordable and Clean Energy**
- **Goal 13: Climate Action**
- **Goal 12: Responsible Consumption and Production**
- **Goal 11: Sustainable Cities and Communities**

IPR Status

No IPR applied

Partner Sought

Expected role of the partner

The partner must be able to provide up to 30.000 pieces of galvanized foundation screw per year under supplier agreement.

Type of partnership

Supplier agreement

Type and size of the partner

- **SME 50 - 249**
- **SME 11-49**
- **SME <=10**

Dissemination
