General Information

Short summary

Hungarian SME from the metal industry is offering its metalworking capacity to business partners. The company's inventory of 70 metal milling machines, including state-of-the-art CNC metalworking centers. The primary activities of the company include the production of machinery and parts, metalworking, as well as designing and producing manufacturing equipment. They are looking for partners who need quality work based on long-term cooperation in standard machining combined with flexibility.

Full description

The Hungarian company has more than 26 years of experience in the metal industry. It provides complex, full-scale services in the metal works field and focuses on maintaining flexible customer relationships. The scale of their products are wide, they deal with the production of individual and mass-produced items ranging from complicated precision parts at the scale of a few millimeters, to machine parts up to three meters by one meter. Additional services include the manufacture and assembly of complete machinery setups. Currently the company's inventory includes 23 3, 4 or 5-axle CNC machining devices, CNC lathes, 16 universal cutting tools, 2 coordinate drilling machines, 1 radial drill, 1 grinding machine, 4 surface grinders, 4 cylindrical grinders, 1 inside diameter grinder, 1 CNC wire-cut and 1 die-sink EDM machine, 43 additional devices including broaching, slotting, grinding and engraving machines, 8 measuring devices including a 3D one, and a paint sprayer system.

The majority (95%) of their products are exported to EU countries directly or indirectly. The most important

destination countries are the following: Germany, France, Sweden, Switzerland, Finland, Belgium, UK, China, USA and the Netherlands.

They keep abreast with innovations and their objective is to provide up to date services. The SME looking for partners to cooperate with them in the following works:

- turning,
- milling,
- grinding,
- welding,
- painting

Advantages and innovations

- More than 20 years of experience in the field of manufacturing
- Up to date services which means high level of precision, quality with the most modern machines
- Flexibility in manufacturing and delivery
- Precision work and high quality using cutting-edge equipment
- Production quality, communication and management on par with Western European counterparts

Stage of development

Already on the market

IPR Status

No IPR applied

Sustainable Development goals

- **Goal 9: Industry, Innovation and Infrastructure**

Partner Sought

Expected role of the partner

They are looking for manufacturers of small and medium sized machine parts to cooperate with them in order to work on solving heat treatment, plating and gear grinding.

Type of partnership

Outsourcing agreement

Supplier agreement
