General Information

Short summary

A Lithuanian company offers its production capacities for small to medium-scale production in the field of wood and plastic. The company consists of highly educated engineering personnel with long years of experience in the manufacturing industry which provides services and full help for companies in need of high-end products. The company itself is young and has a big interest in both long-time partners and/or short-term agreements.

Full description

The Lithuanian-based company offers high precision manufacturing in the field of CNC (Computerized Numerical Control) milling services.

Despite the relatively young age of the company, it has already managed to establish partnerships within the automotive industry, furniture manufacturers, interior designers, and water sports equipment manufacturing and has proven its worth solving complex projects.

The company specializes in these fields:

- CNC milling
- CAD project creating and product optimization
- Small assemblies
- Part making.
- Laser combined operation where engraving is needed
- Consulting and full help dealing with project nuances

The company would like to establish successful partnerships to cooperate under manufacturing agreements and subcontracting. With future partners, the company is seeking to expand its business and gain strength in the market.

Advantages and innovations

The company provides highly responsive and flexible services with professional advice in both manufacturing and optimization of production.

The company offers:

- The highest production quality;
- Very competitive pricing;
- Long-term partnerships and support.
