General Information

Short summary

Well-established metal manufacturing company and supplier of metal components in Sweden offers their services internationally for various sectors under a manufacturing/supplier agreement, including construction, cutting machining, sheet metal work, welding, laser welding, heat treatment, 3D-printing, etc.

Full description

The company, established over 30 years ago, is a manufacturer and complete supplier of a wide range of metal components and services, including construction, cutting machining, assembly & electrical assembly, heat treatment, surface treatment, sheet metal work & welding, laser welding, 3D-printing, etc. The company's products and services are delivered to major international companies in various sectors.

Through active project management in combination with solid experience, the company can take on various types of manufacturing projects and deliver according to agreement. The company also specializes in manufacturing of parts and components for the aftermarket as well as prototype and small series production.

Advantages and innovations

The company has over 30 years of experience and expertise in metal component manufacturing and metalworking. Hence, the company can take on more complex projects while ensuring top quality and delivery according to agreement.
