General Information

Short summary

This Ukrainian company is a modern PCB assembly (Electronic assembly) and PCB fabrication of any complexity of the full cycle. Company is looking for a partner, who is interested in services for the production of electronic equipment. The cooperation may be based on the manufacturing or outsourcing agreement.

Full description

This company, located in the suburbs of Kyiv, is engaged in the assembly and manufacture of printed circuit boards. The company has modern equipment, which allows it to meet all modern requirements.

Modern full cycle PCB assembly (Electronic assembly) and PCB fabrication of any complexity are covered by the company.

The main activities of the company are the supply of electronic components, electronic systems, as well as the provision of services for the production of printed circuit boards and contract manufacturing of electronic products.

Provided services:

- Making stencils for solder paste;
- Design and development of electronic equipment;
- PCB Assembly (Automatic and/or Manual);
- Assistance in the transition to SMT assembly technology;

Manufacturing uses the nomenclature of the element base on lead-free and classical technology.

The company has 3 SMT assembly lines, which ensures an uninterrupted production process.

The company is interested in establishing manufacturing and subcontracting agreements

Advantages and innovations

The company is equipped with the latest, high-performance equipment allowing to perform the full range of services. Installation of electronic components is carried out using the latest developments of well-known world companies, modern automatic equipment, advanced technological processes and materials. Highly automated surface-mounted lines provide installation of passive components 0201 and 01005, active components in BGA and microBGA, work with lead-free technologies and work on the third class IPC610.
