

Business Request

Construction partner sought from Slovenia

Summary

A Hungarian SME contractor (est. in 2008) with a stable, large company background and contacts is looking for partners in Slovenia for construction works. Knowledge of Hungarian as a working language is an advantage.

Description

Nature of work (non-exclusive list):

- Interior and exterior building work (plasterboard installation, false ceilings, space enclosure alterations, painting, plastering, cold and hot tiling, even furniture construction/alterations, replacement of architectural elements inside and outside with specified tools, replacement of windows and shutters, window panes). Concreting, paving.
- Minor building engineering installations (e.g. relocation of sockets, new lighting), installation of low-voltage networks, water outlets, waste water.

Scope of works: demolition and reconstruction works will be carried out in coordinated, intensive phases lasting approximately 30 days.

End of partner search: the partner search is open until the end of August.

Advantages and innovations

-

Technical Specification or Expertise Sought
