General Information

Short summary

A Polish company that delivers concentrates, organic juices, fruit flavors and NFC (not from concentrate) juices from apples, cherries, blackcurrants, rhubarb, strawberries, raspberries and chokeberries to the Polish market, EU and non-EU markets is interested in finding partners from the whole world and offers its products for distribution.

Full description

Polish fruit processing plant established in 1997 offers for distribution its fruit products:

1. Fruit concentrates made of: apples, strawberries, cherries, chokeberries, raspberries, blackcurrants
2. NFC (not from concentrate) juices made of: apples, cherries, blackcurrants, rhubarb
3. Aromas made of: apples, strawberries, cherries, raspberries, blackcurrants
4. Clarified organic apple juice

The production plant meets all applicable legal requirements and other requirements that apply to it in terms of the production process and its environmental aspects.

The company is able to produce 10 000 tons of apple juice concentrate, 2 000 tons of colorful fruit concentrate and 30 000 tons of NFC (not from concentrate) per year. The enterprise owns two independent production lines, which allows it to produce two products at the same time. The production line is equipped in four presses, two evaporators and two ultrafiltrations.

The products comply with the AIJN (European Fruit Juice Association) Practice and directives of European Union. The longtime experience in fruit concentrates and aromas production resulted in modern enterprise rising, which fulfilled all food high-level requirements, safety standards and food quality, confirmed with BRC (British Retail Consortium), SGF (Sure Global Fair), kosher, IFS (International Featured Standard) Food and ISO 9001:2008 certificates. The company has a logistics department that ensures product delivery in a timely manner, through long-term cooperation with reliable companies that are certified in the transport of food products. The product loading process meets all the required standards and sanitary rules.

The company is interested in establishing cooperation under distribution services agreement – the company is looking for distributors to sell the company's products. The company is interested in finding partners from the whole world.

Partner Sought

Expected role of the partner

The biggest group of recipients of the company's products are juice bottling plants, producing the final product for sale to a retail customer. Bottling plants produce from the juice and concentrates delivered in large barrels the final product, in their own packaging, under their own brand. The company will work with bottlers that will deal with further distribution. The second group of recipients are wholesalers of fruit juices, specialized in distribution of product through its own sales networks.

In connection with the above, the company will establish cooperation with:

1. juice bottling plants whose task will be to further distribute juices in their own packaging and under their own brand,
2. wholesalers whose task will be to distribute juices through their own sales networks.
