## General Information

### Short summary

A small Slovak company active in the field of manufacturing of plastic products with technologies of injection moulding and thermoforming is looking for partners to cooperate via commercial agreement or outsourcing. The company offers its free production capacities for manufacturing of plastic products, such as articles for industry and technical mouldings, low voltage testers, toys, moulds and tools, etc.

### Full description

The Slovak SME can ensure the complete production of plastic parts from drawings, design, manufacture of moulds for testing, production of samples to series production of mouldings and subsequent maintenance forms.

The company has its disposal manufacturing, stock and administrative places in the area of circa 4 400 square meters.

The company is specialized in production of plastic parts and products with the following technologies:

- Injection moulding - preferred technology of plastics in company went throughout (because of the competitiveness and growth in the period since 2009) a complete upgrade with the help of financial contributions from EU structural funds.
- Thermoforming - this company is forming plastic materials to 0,3 square meters area.

Typical products of the company include toys, articles for industry and technical mouldings, low voltage testers, moulds and tools.

Application of products is especially in sectors:

- Electrical engineering
- The technical parts for automotive industry
- Toys and sports equipment for children - Garden and housewares

Target group: Companies that need plastic parts for their products.

The requirement for cooperation: The Slovak company offers its free production capacities for the production of plastic products. The Slovak company is looking for partners to cooperate with via commercial agreement or via outsourcing (more explained in the Partner Sought).

#### Advantages and innovations

- customizing of production
- products are manufactured also in a small series and in different material versions - modified materials and also plastic-foam-filled materials
- the company could provide all the advantages of cooperation with the small company (response rate, cooperation without intermediators...)

#### Stage of development

**Already on the market**

#### Sustainable Development goals

• **Not relevant**

#### IPR Status

**No IPR applied**

## Partner Sought

#### Expected role of the partner

Type: company - industry

Field of activity: the Slovak company is looking for companies, which need the plastics parts for their products (there are no sector preferences). Being more specific, the application of the company products is especially in electrical engineering, the technical parts for automotive industry, toys and sports equipment for children

Role of partner: The purchaser of plastics parts is sought. On the other hand, the Slovak company is offering its free manufacturing capacities for its partners.

The cooperation is possible via:

- commercial agreement (the Slovak company is offering production of plastics, as well as its production capacities)
- outsourcing agreement (the Slovak company is offering to become a subcontractor)

#### Type of partnership

#### Type and size of the partner

**Commercial agreement**

• **SME <=10**

**Outsourcing agreement**

• **SME 11-49**

• **SME 50 - 249**

• **Big company**
